PROSPECTIVE STUDENT

Seydikemer School of Applied Sciences

MESSAGE FROM THE DIRECTOR

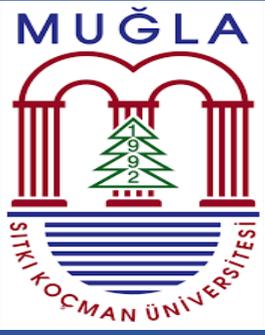

DEAR PROSPECTIVE STUDENTS,

By stepping into a higher education institution, you are at the most important stage of the choice that will shape your life and guarantee your future with a good profession. The professional choice that you will make with enthusiasm will bring academic success, and academic success will provide you with employment in more distinguished fields.

Our school is located in the city center of one of the most beautiful districts of our country. Academic education and trainings are carried out in three departments. These programs, Accounting and Finance Management, Social Service and Customs Management, are mainly determined in accordance with the economic activities and structure of the region. Therefore, our students have the opportunity to be trained as well-equipped personnel who have gained sufficient knowledge and skills preferred by the sectors by being in the field where the practical and theoretical knowledge they have learned is applied. Dear candidates; A good education is provided by a well-equipped and competent teaching staff. In this respect, our school is lucky as it has a sufficient and qualified teaching staff. Completing a program with our academic staff, you will be distinguished in the sector and you will be able to find job opportunities as soon as you graduate. We are waiting for you with friendly academic and administrative staff. On behalf of the school administration, all academic and administrative staff, I offer best regards.

Doç.Dr. Eyüp AKÇETİN
School Director

Seydikemer School of Applied Sciences

Seydikemer School of Applied Sciences was established in Seydikemer in 2015 with the philosophy «Success is not a coincidence.»

Our school has an indoor area of 4200 m² and enclosed open area of 40 decares. In total, school perimeter reaches to 125 decares. There are 6 classrooms and 1 computer laboratory in the facility. The outdoor area offers a football field, tennis court, basketball court and volleyball field.

Seydikemer Uygulamalı Bilimler Yüksekokulu

Accounting and Finance Management	<p>Established in 2016, Accounting and Finance Management Department received its first students in the 2018-2019 academic year. The department aims to train qualified accounting and finance professionals, which are very important for businesses. For this purpose, the professional competencies of the department students are tried to be maximized through theoretical and practical training in the field of accounting and finance. In addition to the field of Accounting and Finance, the most important aim of our department is to create a graduate profile with the knowledge and skills necessary to be successful in today's business world. Considering that the students of our department will mainly work in the fields of Financial Advisory and Certified Public Accountant, studies are carried out to increase their competencies in these areas. Besides, it is aimed to provide our students with the skills to structure, manage and analyze the financial processes of businesses.</p>
Social Services	<p>Social Services program provides education and research on ways to help people in distress make the most of the opportunities currently available to them in the community. The department receives support from fields including sociology, psychology, law, economics and political sciences. In addition to these areas, students receive training in medical and psychiatric social work, family and child welfare, delinquency, population dynamics, social welfare and service methods and interview techniques.</p> <p>Social Service is a profession that provides diverse and new possibilities for people with leadership traits and an interest in the well-being of others. Graduates of the Social Services Department work with the title of "Social Worker". Social workers can work in many public institutions, especially the Ministry of Family, Labor and Social Services, and in private institutions related to the field (dormitory, nursing home, kindergarten, etc.).</p>
Customs Management	<p>Customs Management is an academic discipline that aims to manage the customs that provide border controls of a country in accordance with its legislation, and to train personnel who are competent in import and export.</p> <p>Department of Customs Management in Seydikemer School of Applied Sciences started to accept students with the 2021/22 academic year. Our department, which provides education at the undergraduate level, aims to provide training to meet the needs of trained personnel needed by private sector enterprises, customs consultancy service companies and the public in customs procedures, customs legislation and logistics. For this purpose, in addition to theoretical business courses, customs procedures, customs legislation, package programs, logistics and foreign trade trainings are given up-to-date ,in accordance with the business world. In addition, it is aimed to conduct the courses in cooperation with private and public institutions in order to learn the customs procedures, which are becoming increasingly electronic with automation servers. It is expected that our alumni profile will serve competently, both on a theoretical and technological basis, in the planning and execution of customs field operations of both the public and customs consultancy offices, foreign trade companies or logistics / transport enterprises located in every province of our country.</p>

Seydikemer School of Applied Sciences

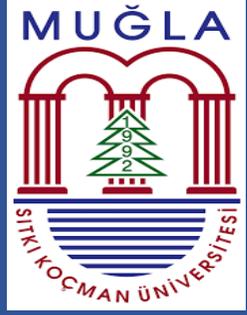

SUMMER INTERNSHIPS

Students of Customs Management and Accounting and Finance Management departments can do their professional internship in the summer term after taking the Occupational Health and Safety course in the second semester (Fall and Spring semesters).

Accounting and Finance Management students have the opportunity to do internships in accounting units of financial advisors, banks, private and public institutions. In this sense, internship opportunities are quite wide.

Students of the Department of Customs Management can do their internship at private institutions providing customs consultancy services, ports and other customs gates. In addition, they can find internship opportunities in companies dealing with foreign trade.

The internship requirement determined as two semesters will also increase students' chances of finding a job after graduation.
